

Weigh Boats

Hexagonal Weighing Boats

Bend flexible boats at points to form pour spouts. Flat bottoms and sloping side provide accurate transfer. These polystyrene boats are non-reactive to most substances. Resist temperatures to 200° F (93° C).

Square Weighing Boats

These sturdy polystyrene boats have a very shallow shape with a wide, flat bottom to resist tipping. Biologically inert and resistant to dilute and weak acids, aqueous solutions, alcohols, and bases. Resist temperatures to 200° F (93° C).

Pour-Boat Weighing Dishes

Pour spout design easily dispenses samples without flexing the dish. Dishes are made from 12 mL thick polystyrene for better strength, stability, and handling. Flat-bottom dishes are biologically inert and resistant to dilute and weak acids, aqueous solutions, alcohols, and bases. Resist temperatures to 200° F (93° C).

Weigh Boats

Aluminum Weighing Boats

Use these oil-free boats for general-purpose weighing, dispensing, storage, food processing, evaporating, or drying. Ideal as dust covers or sample holders. Sturdy, yet lightweight dishes feature a smooth flat bottom for sample handling and a flanged, crimped wall for rigidity. Finger-tab handle can be etched prior to weighing for identification. Made from light gauge aluminum.

Diamond-Shaped Weighing Boats

These rubberized polystyrene boats have a diamond shape that flexes for easy, accurate pouring. Shallow shape and a wide, flat bottom resist tipping. Biologically inert and resistant to dilute and weak acids, aqueous solutions, alcohols, and bases. May be used with microwave moisture analyzers. Resist temperatures to 200° F (93° C).

Weigh Boats & Accessories

Rubberized Boats

Both white and blue colored, flexible boats have smooth surfaces to provide accurate pour-outs with minimal sample loss. These polystyrene boats have a shallow shape with a wide, flat bottom to resist tipping. Rounded corners simplify transfer. Biologically inert and resistant to dilute and weak acids, aqueous solutions, alcohols, and bases. May be used with microwave moisture analyzers. Resist temperature to 200° F (90° C).
